ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHOD FOR CALENDERING A FIBROUS WEB AND A CALENDER

(57) Abstract: The invention relates to a method and a calendar for calendering a fibrous web, which calendar includes at least two roll stacks which each have at least three rolls, and in each of which the web path of the fibrous web meanders between each roll pair of the roll stack. The method is characterized in that in order to produce a selectable fibrous web grade, the fibrous web is passed between each roll pair of each roll stack of the calendar, so that at least one roll pair in at least one roll stack is arranged to be in nip contact to form a nip that calenders the fibrous web. The calendar is characterized in that the fibrous web runs between each roll pair of each roll stack and that in order to produce a selectable fibrous web grade, a selectable number of rolls has been arranged to be in nip contact with each other in each roll stack to form at least one nip that calenders the fibrous web.
